Dear AVS 61 Author,

I am writing to encourage you to submit an article to JVST A, JVST B or Biointerphases on the topic of your presentation at the AVS 61st International Symposium.

You can submit your articles/letters based on your talk at the AVS 61st International Symposium at any time between now and the end of the year.

Your article/letter will be peer reviewed rigorously as a regular submission and, if accepted, will be published in the first available issue: we will not hold articles in order to publish them all together in a single issue.

Your article/letter will get either an article or letter designation on online data bases such as ISI; it will NOT be designated as a proceedings paper.

You can choose either JVST A, JVST B or Biointerphases depending on the topic.

There are no length limitations and your manuscript can be as long as it needs to be to convey your ideas and results in the most succinct way.

You can find easy to use templates and instructions for authors at http://scitation.aip.org/content/avs/journal/jvsta/info/authors, http://scitation.aip.org/content/avs/journal/jvstb/info/authors, and http://scitation.aip.org/content/avs/journal/bip/info/authors.

For your convenience an article template is available on the JVST A, JVST B or Biointerphases websites.

JVST A, JVST B and Biointerphases have many new additions. The journal web pages utilize quick links and advanced search capabilities. Articles are fully citable as soon as published online.

If you have any questions, please do not hesitate to contact our office at publications@avs.org or the AVS Editor-in-Chief directly at aydil@umn.edu. The Publications Staff and I will be at the AVS Symposium in Baltimore. Please stop by the Publications Booth in the AVS-61 Exhibit Hall during the Symposium to visit and chat with us.

Sincerely,

Eray Aydil,
AVS Editor-in-Chief
